

Graduate Structural and Civil Engineers

Come and Join Price & Myers

Price & Myers is a civil and structural engineering practice, established by Sam Price and Robert Myers in 1978. Over more than four decades we've completed a huge range of projects, from Stirling Prize winners to domestic back extensions. We are designers who help architects and clients bring their vision to life with elegant and efficient engineering. There are about 130 of us across our four studios in London, Oxford, Nottingham and Bristol.

We aim to design elegant engineering solutions, produce clear and well-presented drawings, and provide a high-quality and enthusiastic service.

Our work covers an unusually wide range, both in size and type. Projects vary from minor alterations and extensions, to major new buildings and refurbishment projects, using the most recent developments in materials and construction techniques. We have advised on the repair and restoration of many historic buildings, and we have worked with some of the country's leading architects on the design of many outstanding modern buildings. Our diverse project portfolio allows us to find the right solution for every job.

Studio Life

Each of our offices has its own personality but shares the same open, friendly atmosphere. You'll find people who enjoy their work, their teams, and the chance to swap ideas.

Our offices are centrally located in lively parts of their respective towns - close to great restaurants, cafés, pubs, shops, and theatres. There's always something going on nearby, and plenty of opportunities to make the most of city life after hours.

Training

At Price & Myers, there's a clear commitment to development and training. You'll have:

- A comprehensive CPD programme
- Buddying and mentoring so you're never on your own
- Active support towards chartership

The breadth of our projects means you'll tackle a wide range of challenges and build strong foundations in practice. This approach has led to a higher than average pass rate in the IStructE Chartered Membership Exam, and many of our engineers pass the ICE Professional Review at their first attempt.

Above all, we want you to enjoy your work and grow with us. Many of our current Associates and Partners began their careers here as graduates, and we see each new joiner as a long-term part of the practice.

Graduate Structural and Civil Engineers

We are looking for a number of sharp-minded, confident, sociable people who want to work on a variety of high-quality and challenging projects within our structural or civil engineering teams. We offer a competitive salary and attractive benefits package.

If you are a structural/civil engineering graduate seeking employment starting in Autumn/Winter 2027, please email a CV and covering letter to Jamie Beeson using the following address:

graduatejobs@pricemyers.com

Duties/responsibilities

As part of the team, you will work under senior staff supervision on several projects, always looking to achieve Price & Myers' aim of excellence. You'll get the opportunity to be involved in a variety of projects and you will be supported in your professional development through a combination of formal and informal training.

You will be required to carry out design work on all aspects of our projects, including scheme design and detailed design by preparing sketches, drawings specifications, schedules and calculations. You will be also required to attend design and site meetings and assist in general project administration, which includes ensuring all emails are filed using our filing system, Newforma, establishing paper filing for project drawings and documents, and ensuring a 'Summary of Design Principles' document is prepared and quality assurance (Q.A.) is carried out when required.

You will organise and supervise the work of others, including technicians and project coordinators, on projects and you will assist the more senior engineers with the financial management of the projects. You will be required to take part in office training and general office administration – such as attending Friday meetings, especially the 'Successes & Challenges' section. You will be invited to organise your own CPD and will be encouraged to make use of and offer improvements to all office technical and administrative systems.

Contract type

Permanent, Full Time

Working hours/days

37.5 hours/week, Monday – Friday, in line with our flexible working policy

Salary

Competitive

Expected commencement date

Autumn/Winter 2027

Required skills/experience

Ideally you will already have some experience, for example a Summer placement, with an engineering consultancy.

Minimum degree class

Relevant BEng or MEng in structural/civil engineering.

Price & Myers are an equal opportunities employer
